Suzy,

If possible, can you provide the direction (north, south, etc.) to which the sample location was moved?

Thanks,

Tanya

Subject: Soil Sample Relocation
Importance: High

Tanya,

On Friday (January 2, 2015) at one of the last soil locations (SS-137), the field crew observed glass on the ground surface at the proposed location. The crew moved 10 feet until they did not observe any trash and then collected SS-137 and SS-138, 25 feet and 50 feet from this point. We sent these samples to the laboratory but have placed them on hold until we have your approval for analysis.

If you would prefer for us to revise FCN-02 with this information, we can do that and resubmit today. After we have your approval, we can go out to those locations and recollect the samples.

Given that the schedule has already been delayed and recollecting these samples would increase that delay, we would prefer not to repeat the sampling. However, we will do so if necessary.

Please let me know how you would like us to proceed.

Thanks,

Suzy
